

Pry is my must Gem in every Rails application

In 2017 I finished the Dev Bootcamp in Austin TX

Always when we asked an instructor for help, his first question was: do you have the Gem Pry?

Now my first added Gem in a Rails project is Pry

Pry: Pry is a powerful alternative to the standard IRB shell for Ruby

Add Pry to the Gemfile

```
gem 'pry'
```

To use Pry You can add Pry wherever you want with

```
def do_something
  binding.pry
  ....
  ....
end
```

Or in the view

```
<%= binding.pry %>
```

Then Check out the console where the rails server is running

```
5: def do_something
=> 6:   binding.pry
   7:   ....
   8:   ....
   9: end
```

```
[1] pry(#<ChatsController>)>
```

Now you have access to everything you need

If you are using the Pry in a loop, to see next step in the loop just type exit

and thats it !!
