

Yarn uninstall and install

I had problems with yarn the other day, and i wanted to uninstall and install yarn again

This worked for me:

```
brew uninstall --force yarn  
npm uninstall -g yarn  
yarn -v
```

=> 1.1.0

```
which yarn
```

=> /usr/local/bin/yarn

```
rm -rf /usr/local/bin/yarn  
rm -rf /usr/local/bin/yarnpkg  
which yarn
```

=> yarn not found

```
brew install yarn  
brew link yarn  
yarn -v
```

=> 1.22.4
