

Favicon Rails

Create your personal favicon icon. There are a lot of favicon creator tools online.

In rails add the icon to the public folder

then check if the icon works with enter in the browser <http://mypage.com/favicon.ico/>

Next, insert the below code in the HEAD section of your pages, at the very least, your site's main index page.

```
<link rel="shortcut icon" type="image/x-icon" href="/favicon.ico">
```

Refresh the browser.

and thats it !!
