

# Search in Table with jquery

---

Search for Items in a Table.

Html table:

```
<table id='myTable'>
  <thead>
    <tr>
      <td>Header 1</td>
      <td>Header 2</td>
      <td>Header 3</td>
    </tr>
  </thead>
  <tbody id='myTableBody'>
    <tr>
      <td>1</td>
      <td>2</td>
      <td>3</td>
    </tr>
    <tr>
      <td>a</td>
      <td>b</td>
      <td>c</td>
    </tr>
  </tbody>
</table>
```

Then we add a search field above the table:

```
<input id='mySearch' type='text' placeholder='Search... '>
```

Then the jquery code on the bottom of the file:

```
<script>
  $('#mySearch').on('keyup', function() {
    let val = $(this).val().toLowerCase();
    $('#myTableBody').filter(function() {
      $(this).toggle($(this).text().toLowerCase().indexOf(val) > -1)
    });
  });
</script>
```
