

Switch Java versions on mac

first run `java -version` to see what version is default.

run `/usr/libexec/java_home -V` in the console.

You should see something like this.

```
Matching Java Virtual Machines (2):
 11, x86_64: "Java SE 11"  /Library/Java/JavaVirtualMachines/jdk-11.jdk/Contents/Home
 1.8.0_181, x86_64: "Java SE 8" /Library/Java/JavaVirtualMachines/jdk1.8.0_181.jdk/Contents/Home
```

Pick the version you want to be the default.

run:

```
export JAVA_HOME=`/usr/libexec/java_home -v 1.8.0_181, x86_64`
```

run `java -version` again to see the change.
