

Different background colors or images for different pages in rails

In the layout add the if statement in the body tag:

```
<body class- "<%= @home_page ? 'homepage' : ''%">>
  <%= yield %>
</body>
```

And in the controller add the variable:

```
def index
  @home_page = true
  #rest of the code
end
```

And finally use the class homepage in the css file to give the background
