Do you wonder how to add the small icon on the top of your browser?

Well, here we go On this page you can build your own icon

editor After building your icon go to the page

build and Download the icon

Add the icon to your homepage.

In rails add the icon to the public folder

then check if the icon works with enter in the browser http://mypage.com/favicon.ico/

Next, insert the below code in the HEAD section of your pages, at the very least, your site's main index page.

```
<link rel="shortcut icon" type="image/x-icon" href="/favicon.ico">
```

Refresh the browser.

and thats it !!
